

For those wishing to initiate a simple, cost effective “Green” technology program for their vehicles and equipment, a product designed to do just that is now available. Proven effective in use by the Government for the past 30 years, this combustion catalyst compound is now available thru **Greenfoot Global’s EnviroTabs**.

EPA registered, this product is approved by the Department of Transportation for use in any gasoline, ethanol, diesel, bio-diesel and any mix of hydrocarbon fuels. Using EnviroTabs in any combustion engine helps in reducing engine emissions by up to 75%, lowering octane requirements, increasing fuel economy, extending oil and engine life and increasing horsepower and torque by simply adding a tablet to the gas tank at each and every fill up.
